

# Rittal's Free-Standing SE 8:

## Easy Access Design for Indoor and Outdoor Control Systems Enclosures

The Rittal SE 8 non-bayed model offers the benefits of modular design and accessories with a price point that competes with unibody enclosures. Because the strength and interior mounting are handled by the roll-formed sides of the enclosure, the SE 8 delivers improved durability and 30 percent more internal space than comparable unibody designs.

The SE 8 is available in light-weight, 16-gauge, carbon or stainless steel, as a stand-alone PC or control system enclosure. It features the standard, reversible TS 8 door and a wide range of accessories to accommodate modifications over the lifecycle of the enclosure.

### Stand-Alone PC Enclosure:

#### Available in carbon or stainless steel

- Ensures protection of essential components
- Rear door allows easy access
- Roll-formed one-piece sides and roof; Lockable keyboard drawer
- Integral mouse pad extension pulls out to the left or right
